yummiestnyc Checked out the new @blazepizza in Staten Island (2590 hylan blvd) tonight and it was awesome !! It's basically the Chipotle of pizza - you can build your own or get one of their signatures!! They have a GF crust so totally gluten free friendly, a vegan cheese option, and you control what's on it making it amazing for dieting! If you haven't tried Blaze yet be sure to check out one of their many locations
